

Data Summary: Improving Performance and Controlling *Salmonella*

Manufactured Under Exclusive License
from the University of Arkansas

FloraMax-B11™

Proven in the lab...Confirmed in the field.

Description: FloraMax-B11 is a unique probiotic for poultry. Developed at the University of Arkansas after years of research, FloraMax-B11 is specifically formulated to address economically important factors affecting the poultry industry. The benefits of FloraMax-B11 have been documented in more than 110 published, refereed manuscripts, abstracts and proceedings.

Benefits:

- Reduces *Salmonella spp.* and other undesirable bacteria
- Establishes protective microflora
- Improves feed conversion
- Increases daily gains
- Decreases days to market
- Reduces medication costs
- Enhances gut health and litter conditions
- All natural
- Lowers mortality
- Improves flock uniformity

Directions for use: For optimal performance, treat as soon as possible after placement, mixing product in a stock solution sufficient to allow consumption in 6-12 hours.

Use of a vaccine stabilizer or dry skim milk is recommended.

Administration of FloraMax-B11 after Optimizer™ treatment has consistently enhanced performance of this product.

Ingredients: FloraMax-B11 contains strains of lactic acid bacteria, skim milk, fructo-oligosaccharides and inactivated *Saccharomyces cerevisiae*.

Storage Instructions: Keep product refrigerated. Brief exposure to room temperature will not affect product quality.

FloraMax-B11™

Field and Research Data:

FloraMax-B11 is the result of extensive laboratory and field testing conducted by the University of Arkansas and Pacific Vet Group. It is an all natural product that is known to establish a highly protective microflora in the gastrointestinal tract of poultry. FloraMax-B11 provides an alternative to antibiotics and a natural solution for maintaining healthier birds in addition to performance benefits. No other probiotic is known to have as many published, refereed studies with proven results. Listed below are samples of some of the performance data.
